Why Should I Recycle?

Recycling conserves resources, supports local businesses, protects our environment, and saves taxpayers money - and it's easy! When you recycle, materials that would otherwise be buried in a landfill or burned in an incinerator are diverted from the waste stream. Through recycling, your "trash" is transformed into a valuable commodity that can be remade into many other useful products.

Hazardous Waste Disposal

If you have household hazardous materials to dispose of that are not accepted at your town's Transfer Station, contact the Barnstable County Cooperative Extension.

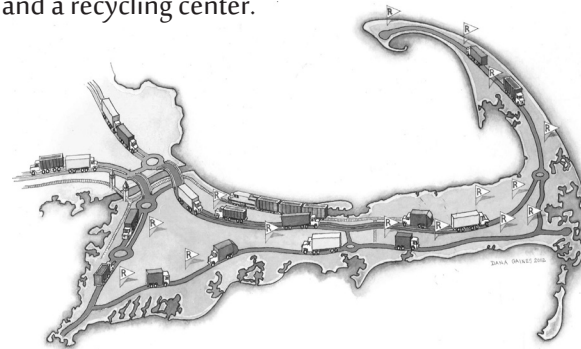

Call (508) 375-6699 or check their website for collection dates: www.capecodextension.org

What can I Recycle? and Where should I go?

This flyer contains information about recycling programs in each of the 15 towns on Cape Cod. If you have questions about specific recyclable materials or about items that are not listed, contact your local transfer station at the telephone number listed.

Help Save Money by Reducing Trash!

Removing trash from Cape Cod is expensive! Fourteen out of the fifteen Cape Cod towns operate a 'transfer' station (marked on the picture below with flags) where trash and recyclables are collected. Trash is transferred to a waste-to-energy facility, Covanta SEMASS, in Rochester, MA by both trucks and train. The Town of Bourne operates an integrated solid waste management facility, which includes a landfill and a recycling center.

While enjoying your stay on Cape Cod, we hope you will join in the effort to help save money and protect our beautiful natural resources by producing less trash and recycling more...
